JACK SCHAIBLE

SKILLS

- **Leadership & Collaboration**: Agile team leadership; backlog grooming, sprint planning, retrospectives; mentoring junior developers and providing structured PR feedback across distributed teams

- **Cloud Platforms**: Microsoft Azure (App Services, AzureSQL, Service Bus, Functions, Blob, App Insights, Redis); AWS (EC2, S3, Route 53, Redis)

- **Backend Development**: C# (.NET Standard, WebAPI, SignalR, MVC, Web Forms, Windows Forms, WCF, COM); Python (Django, Flask); Rust (Actix); PHP (Laravel)

- **Web & UI**: Angular (JS/2+), React, SASS, JavaScript, HTML, Bootstrap, Angular Material, jQuery

- **Infrastructure & Databases**: SQL Server, MySQL, Oracle, SQLite, IIS, Nginx, Apache, Ubuntu

- **DevOps & CI/CD**: Git (Azure DevOps, GitHub, GitLab), Azure DevOps Pipelines, AWS CodePipeline, GitHub Actions, TeamCity, Jenkins, Sentry

- **APIs & Integrations**: REST, GraphQL, Facebook, Twitter, LinkedIn, ShotGrid, TimeAndDate.com, TrustSphere

- **Communication**: Strong communicator with non-technical stakeholders; clear written documentation and verbal collaboration

EXPERIENCE

SENIOR SOFTWARE ENGINEER, ONEBRIDGE SOLUTIONS/Irth Solutions
September 2023-July 2025

- Mentored offshore developers through PR feedback and direct support, improving code quality and team efficiency
- Built modern front-end using latest .NET, C#, and TypeScript with GraphQL and SignalR
- Helped design and implement Azure infrastructure: Service Bus, Functions, Blob Storage
- Delivered solutions for energy pipeline operations within a small, agile team

SENIOR SOFTWARE ENGINEER, LAIKA
November 2021-July 2023

- Took point on **Agile team leadership**: led sprint planning, backlog grooming, and retrospectives; helped define priorities and translate production needs into actionable technical work
- Provided mentorship and technical guidance across a distributed team, focusing on code quality and maintainability

- Designed and built internal tools for scheduling, fabrication, and scene planning using **React, Rust (Actix), Python (Flask/Django)**, and **ShotGrid's Python/REST API**
- Collaborated directly with stakeholders from across the studio — animators, ADs, schedulers, fabricators — to gather requirements and iterate based on feedback
- Managed permissions and workflows within Shotgun to support production needs

SOFTWARE DEVELOPER, PANDELL TECHNOLOGY

January 2021-September 2021

- Developed new features in a geospatial land rights platform using C#, ReactJS, and SQL Spatial
- Built and maintained unit test suites in a TDD environment
- Integrated and transformed third-party data into internal formats

SENIOR WEB DEVELOPER, AMA

July 2017-January 2021

- Contributed to the migration of large AngularJS apps to modern Angular, including amatravel.ca and ama.ab.ca
- Helped modernize legacy systems: assisted in rebuilding a large WordPress platform into an Angular/C#/SQL app
- Built and maintained web tools for campaign automation, appointment booking, SMS (Twilio), image validation (TinEye), and OCR (Taggun)
- Developed internal CMS extensions for managing user content, ballot submissions, and community events
- Improved DevOps workflows via Azure DevOps CI/CD, and implemented performance optimizations (AOT, Gzip, SEO tuning)
- Collaborated with designers, copywriters, and analytics teams to build customer-facing tools and dashboards

OTHER EXPERIENCE

LEAD DEVELOPER OMNI TECHNOLOGY SOLUTIONS – 2014-2016:

- Lead a SCRUM team, modernized COM/MVC integrations, and handled client support

CTO GenerUs/Coupons4Giving – 2013-2014

- Took .NET-based SAAS product from idea to launch; led mixed in-house and outsourced teams

Freelance Developer – 2012-Present

- Built/maintained small scale web apps (C#/Angular, Laravel, WordPress, etc.)

EDUCATION

Diploma: Digital Media & IT, designation in Application Development: NAIT
